

Nu Html Checker

This tool is an ongoing experiment in better HTML checking, and its behavior remains subject to change

Showing results for contents of text-input area

Checker Input

Show ☒ source ☐ outline ☐ image report [Options...](#)

Check by ☐ CSS

```
@extends('layouts.app')

@section('content')
  <link href="{{ asset('css/register.css') }}" rel="stylesheet">
  <div class="container mt-2">
    <div class="text-center mb-3">
      <p class="login-section-text" style="color: #006aa7;">
        Create a new account
      </p>
    </div>
    <div class="register-container">
      <div class="card register-card">
        <div class="card-body">
          <form method="POST" action="{{ route('adminPage.create_user') }}"
class="login-form">
```

[Check](#)

Use the Message Filtering button below to display options for hiding/showing particular messages, and to see total counts of errors and warnings.

Message Filtering *4 messages hidden by filtering*

1. **Error** Element `head` is missing a required instance of child element `title`.

[From line 1, column 1; to line 1, column 23](#)

```
@extends('layouts.app')↔↔@sec
```

Content model for element `head`:

If the document is [an iframe srcdoc document](#) or if title information is available from a higher-level protocol: Zero or more elements of [metadata content](#), of which no more than one is a [title](#) element and no more than one is a [base](#) element.

Otherwise: One or more elements of [metadata content](#), of which exactly one is a [title](#) element and no more than one is a [base](#) element.

2. **Error** A document must not include more than one `autofocus` attribute.

[From line 30, column 29; to line 30, column 135](#)

```
<input id="name" type="text" name="name" value="{{ old('name') }}"
required autofocus class="form-control">
```
