

Nu Html Checker

This tool is an ongoing experiment in better HTML checking, and its behavior remains subject to change

Showing results for contents of text-input area

Checker Input

Show ☒ source ☐ outline ☐ image report [Options...](#)

Check by ☐ css

```
<!-- about.blade.php -->

@extends('layouts.app')

@section('content')
    <div class="container mt-5">
        <h2 id="about-heading" class="mb-4">About Us</h2>
        <div id="about" class="about-container">
            <div class="about-card" onclick="toggleAbout(this)">
                <h2 class="about-page">Who We Are</h2>
                <div class="about-body">
                    <p>We are ProjectSync, a team passionate about providing
effective project management solutions. Our primary objective is to develop an
efficient information system with an intuitive web interface tailored to meet
intricate project requirements.</p>
                </div>
            </div>
        </div>
    </div>
```

[Check](#)

Use the Message Filtering button below to hide/show particular messages, and to see total counts of errors and warnings.

[Message Filtering](#) 2 messages hidden by filtering

1. **Error** Element `head` is missing a required instance of child element `title`.

[From line 1, column 25; to line 3, column 23](#)

```
de.php --><@extends('layouts.app')<@sec
```

Content model for element `head`:

If the document is [an iframe srcdoc document](#) or if title information is available from a higher-level protocol: Zero or more elements of [metadata content](#), of which no more than one is a [title](#) element and no more than one is a [base](#) element.

Otherwise: One or more elements of [metadata content](#), of which exactly one is a [title](#) element and no more than one is a [base](#) element.

Document checking completed.
