# Nu Html Checker

This tool is an ongoing experiment in better HTML checking, and its behavior remains subject to change

Showing results for contents of text-input area

Checker Input

Show ☑ source ☐ outline ☐ image report [Options…]

Check by [text input ▾] ☐ css

```
<!-- login.blade.php -->

@extends('layouts.app')

@section('content')
    <div class="container mt-2">
        <div class="text-center mb-3">
            <p class="login-section-text" style="color: #006aa7;">
                Welcome to our website! Please log in to access your account and
explore our services.
            </p>
        </div>

        <div class="login-container">
            <div class="card login-card">
```

[Check]

Use the Message Filtering button below to display options for hiding/showing particular messages, and to see total counts of errors and warnings.

[Message Filtering] *25 messages hidden by filtering*

1. **Error** **Element** head **is missing a required instance of child element** title **.**

    [From line 1, column 25; to line 3, column 23](#)

    ```
    de.php -->↵↵@extends('layouts.app')↵↵@sec
    ```

    Content model for element head:

    If the document is an iframe srcdoc document or if title information is available from a higher-level protocol: Zero or more elements of metadata content, of which no more than one is a title element and no more than one is a base element.

    Otherwise: One or more elements of metadata content, of which exactly one is a title element and no more than one is a base element.

Document checking completed.
